1. Applicant's election with traverse of Group I in the reply filed on May 17, 2007 is acknowledged. The traversal is on the ground(s) that there would not be serious burden on the examiner to examine both groups. This is not found persuasive because there would be undue burden on the examiner because the two groups are classified in different subclasses in class 429 and therefore would require extra work and effort to examiner.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 11-13 and 15-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1 and 14 are rejected under 35 U.S.C. 102(a) as being anticipated by JP-2002-029701. ('701)

Reference is made to the English language abstract to '701 along with paragraph 32 in the machine translation of the same. These portions teach removing an odorant from a mixed gas that is fed to a fuel cell utilizing a deodorizer-zinc oxide that desulfurizes and thus decomposes the odorant.

Art Unit: 1745

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over '701 taken in view of both DE-10115220 ('220) and US 6,294,276. ('276)

The only claimed features not taught by '701 are the specific porous adsorbents and the particular catalyst. The '220 reference teaches in the cited search report that zeolite or active carbon is used to remove sulfur from a hydrogen rich gas stream. The '276 patent sets forth in column 11, lines 41-60 the use of palladium can be used to purify hydrogen before the same is fed to a fuel cell. To have thus incorporated either the zeolite, active carbon or the palladium as taught in the references to '220 and '276 would have been obvious to one of ordinary skill in this art at the time the invention was

Art Unit: 1745

made so that the hydrogen gas fed to the fuel cell would be free of odorants and thus would not harm the catalysts in the fuel cell.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

JP-2003-293866 teaches silica gel that removes gas odorant in a fuel cell.

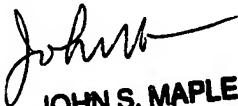

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Thursday, 6:15-3:45, and every other Friday.
